WORK EXPERIENCE

Software Developer | Ascendens Asia

July 2024 - Present

Angular, GraphQL, MySQL, Laravel, Docker & Linux

- Reduced System Logs module load time from **10 minutes to 3 seconds** for over **30 million** log entries by optimizing SQL queries, applying indexing, implementing efficient pagination.
- Optimized a heavy query used for student search across a **30,000–40,000** population by improving conditions, indexing key fields, and restructuring query logic for performance.
- Deployed feature branches to **UAT and Production** environments with version control standards.
- Configured and maintained existing **AWS EC2** instances, including resource upgrades and downgrades.
- Utilized **AWS S3** for file storage, **CloudFront** for content delivery with **CSP**, and **Route53** for DNS management.
- Configured and maintained local development environments using **Docker** for consistent setup across teams.
- Analyzed large datasets and built complex SQL queries to generate automated CSV reports for operations & management.
